

This is the original logo that you saw in January.

- Original Bird -

Is more stylized and feels more like a paintbrushed “swoosh” especially when used at smaller sizes.

- New Bird -

Is easily recognized as an eagle.
The space between the feathers reproduce better at smaller sizes.
Eye gives the head more personality.

- **New Logo** -

Doesn't mix up the "T" in the logo like the original, which makes it easier to read quickly.
This layout also makes it "easier" to separate the torch mark from the logotype.

- Seperate Logo -

The torch mark can be seperate from the logotype (on back of cap).

There is only one way to stop the government from spying on you. Vote Libertarian

The NSA is completing a \$1,200,000 data storage building in Bluffdale, Utah. This building is devoted to electronic spying and will have the capabilities to hold over a thousand years of data.

The Facts:

The U.S. Government currently spends \$75,000,000 every year to specifically spy on U.S. citizens like you. This is a violation of your 4th Amendment Rights.

The agencies recently authorized to spy on U.S. citizens are:

- | | |
|----------------------------------|---|
| National Security Agency | Department of Energy |
| Air Force Intelligence | Department of State |
| Central Intelligence Agency | Drug Enforcement Administration |
| Defense Intelligence Agency | Marine Corps Intelligence |
| Department of Homeland Defense | National Security Agency |
| Federal Bureau of Investigations | National Geo spatial-Intelligence Agency |
| National Reconnaissance Office | Office of the Director of National Intelligence |
| Army Intelligence | Transportation Security Administration |
| Coast Guard Intelligence | Navy Intelligence |

The supporting graphics and how they are used won't change.
